## DOMAIN CAPABILITIES

### IT Infrastructure

- Multi-site network modernization
- Entra ID / Zero Trust implementation
- MSP exit strategy and execution
- SIEM deployment and tuning (Wazuh)
- Hyper-V, UniFi, M365, GCC-High
- Field connectivity and edge compute

### Cybersecurity & GRC

- CMMC Level 1 and Level 2 compliance
- NIST SP 800-171 implementation
- CUI enclave design and deployment
- DCSA audit preparation and response
- ISO 27001 program development
- Risk assessment and POA&M management

### Cleared Operations / FSO

- Secret and Top Secret FCL management
- NISPOM compliance and self-inspection
- DISS, NBIS, NCAISS administration
- Personnel security and visit requests
- Multi-entity FCL consolidation
- ITPSO and NCMS-trained FSO

### Program Management

- Director-level multi-program oversight
- \$324K annual budget direct management
- Vendor negotiation and contract management
- HUBZone and WOSB compliance
- 20+ federal proposals, zero errors

### Facilities & Operations

- \$710K renovation project oversight
- Multi-site lease restructuring
- Secure facility design and build-out
- VoIP architecture from scratch
- Capital project and NOI modeling

### Innovation & Leadership

- Direct report to President / COO
- Custom SharePoint GRC platform build
- ITSM implementation and governance
- Systems designed to outlast involvement
- Non-technical executive translation
- Army veteran, 15+ years DoD contracting

## OPERATIONAL PROFILE

Army veteran and systems thinker with **15+ years of director-level leadership** in federal contracting environments. Simultaneously governs IT, cybersecurity, compliance, cleared operations, and facilities across as many as **five active DoD contracts** -- with no dedicated support staff in any domain.

Builds programs designed to **survive direct involvement**.

Translates operational complexity into frameworks non-technical leadership can act on.
